

Template for an Abstract to PDESoft2012

Author1^a and Author2^b

^a *University of Author1*

^b *University of Author2*

This is a template for an abstract for the PDESoft 2012 workshop.

We kindly ask you not to use any new definitions or packages (except for additional language options to the babel package; for an example see affiliations of authors above).

Since we are going to combine all contributions into a single file we kindly ask you to use the following scheme for labels and file names. All labels (e.g., to your references (cf. [1])) and file names must start with first three letters of the name of the (co)author who submits the contribution. Here we use **tmp** for this purpose.

The text must not exceed one page with margins fixed in this template (otherwise it will be returned to the submitting (co)author). It may contain tables (cf. Table 1) and pictures (cf. Figure 1).

Figure 1: Some figure.

We are going to put the book of abstracts on the web. You should submit your abstract via e-mail to `pdesoft2012@uni-muenster.de` using the subject “Abstract Submission”. Deadlines are listed below.

March 31, 2012	Submission of abstract
April 30, 2012	Decisions of acceptance as talk or poster
Mai 31, 2012	Registration

Table 1: Deadlines.
